PROFILE

Software Engineer at Stibo DX on cloud-native SaaS (Cue Autopilot): Angular/TypeScript product work plus production platform (Kubernetes/OpenShift, GitOps, API gateways, observability). Uses AI as an engineering system — skills/rules, MCP tool wiring, and structured agent workflows — with human review. Career changer; full-time engineering since 2023. Mentors aspiring developers (HackYourFuture).

EXPERIENCE

Software Engineer — Stibo DX Feb 2024 – Present
Aarhus, Denmark · Full-time

- Build and ship Cue Autopilot features (Angular/TypeScript) on a cloud-native SaaS platform.
- Owned improvements to the main Cue CI pipeline that materially reduced build time.
- Work on production platform pieces: Kubernetes/OpenShift, GitOps (ArgoCD), Kong, secrets in Git, observability (Prometheus/Grafana/Loki, Dynatrace).
- Contribute to Angular microfrontend extraction — modular delivery and clearer team boundaries.
- Deliver AI-driven integrations; use AI-assisted engineering daily in feature delivery and debugging.
- Ramping into Quarkus microservices (PostgreSQL, OpenTelemetry/Dynatrace) alongside frontend ownership.

Volunteer Mentor — HackYourFuture Denmark Dec 2025 – Present
Aarhus · Hybrid

- One-on-one student support and class mentoring for aspiring software developers.

Frontend Developer (Intern) — RaskRask Jul 2023 – Sep 2023
Aarhus · Internship

- TypeScript, React, Next.js, Ionic — full lifecycle from planning to testing and maintenance.
- Contributed to architectural decisions on booking-system state management.

Career Transition · Self-directed study Nov 2022 – Jul 2023
Aarhus

- Self-taught TypeScript, React, Next.js, and Node.js; built portfolio projects and prepared for first developer role.

IT Technician — APK Garage Dec 2019 – Aug 2020
Cyprus · Full-time

- Hardware/software support, installs, troubleshooting — kept workshop machines running for the team.

EDUCATION

Technical School — Architecture track — Texniki Sxoli Agiou Lazarou Larnaca, Cyprus
